

Vaccine & Deworming Schedule

Puppy & kitten — a typical first-year timeline.

DOG — Puppy

AGE	CORE VACCINES	DEWORMING
6-8 wk	DHPP #1 (distemper, hepatitis, parainfluenza, parvo)	Deworm; start as early as 2 wk, repeat every 2 wk
10-12 wk	DHPP #2 (± Leptospirosis #1)	Deworm (every 2 wk through 12 wk)
14-16 wk	DHPP #3 + Rabies (± Lepto #2)	Deworm; then monthly to 6 mo
12 months	DHPP + Rabies + Lepto boosters	Routine / monthly preventive
Lifestyle	Bordetella, Lyme, canine influenza (by exposure)	Year-round flea/tick & heartworm prevention

CAT — Kitten

AGE	CORE VACCINES	DEWORMING
6-8 wk	FVRCP #1 (rhinotracheitis, calici, panleukopenia)	Deworm; repeat every 2 wk
10-12 wk	FVRCP #2 (± FeLV #1 for at-risk)	Deworm (every 2 wk through 12 wk)
14-16 wk	FVRCP #3 + Rabies (± FeLV #2)	Deworm; then monthly to 6 mo
12 months	FVRCP + Rabies (± FeLV) boosters	Routine / monthly preventive

Always confirm with your veterinarian.

Vaccine laws (especially rabies) and exact timing vary by state, region and your pet's lifestyle and health. This is a typical guide, not a prescription. Lepto is now a core canine vaccine (AAHA).
